

## School

Urban school example

## School Champion(s)

Teacher

## Where are we now?

Our school is situated in a large city. We struggle with air pollution and congestion around our school due to the large volumes of idling cars. We want to encourage more pupils to walk, cycle and scoot to school to improve their overall health and wellbeing as many pupils don't have access to gardens and outdoor space close to their home.

## What do we want to change?

We would be interested in further increasing Active Travel participation by 25% and looking into a potential school street to reduce traffic directly outside our school.

## Goals for academic year

- 1: Motivate and inspire more pupils and parents to walk, cycle and scoot to school
- 2: Improve and increase cycle storage facilities
- 3: Reduce car use and pollution surrounding our school (School Street?)

### Other notes:

We have several families who do not own a car due to our area being well linked with public transport and amenities. Therefore, many pupils and parents already walk. However, we would like to inspire and motivate families who own a car to reduce its use.

Actions How to achieve your goals this year?		Completion date	Who is responsible?	Which goal impacted?
Autumn	Fun Active travel event for pupils (drawing competition?)	September	School Champions
